

# ROTATIONAL MOLDED KNEEBOARD

## Information Sheet

Wever is one of a handful of kneeboard manufacturers in the world.  
A kneeboard is a good piece of equipment to start out on for boat-towed sports.  
The low center of gravity often makes it easier to get up on than a water ski or wakeboard.

- High impact synthetic rotational moulded kneeboard shell
- High buoyancy foam core
- Orthotic EVA pad for comfort
- Padded knee strap with embroidered logo
- Patented retractable hook for placing handle
- Thin profile design for maximum performance
- Branded or OEM/ODM

**WEVER** *quality you can trust*
